Problem set 4

TDT 4205 - Sigurd Strømsem

1.1

    main:
            Beginfunc 12
            param 2
            param 3
            param 4
            return call axpy, 3
            Endfunc

    axpy:
            Beginfunc 20
            r1 = a * x
            r2 = r1 + y
            return r2
            Endfunc

1.2 - 1.3

    Time did unfortunately not allow for these assignments to be completed.
